

FACT SHEET

January - March 2026

ROLE AND RESPONSIBILITIES OF THE COMMISSION

At the centre of Khyber Pakhtunkhwa health sector stands the Health Care Commission, an autonomous body established under the Khyber Pakhtunkhwa Health Care Commission Act, 2015. Created to bring order, accountability, and excellence to health services, the Commission functions as the principal regulator of the province, overseeing a vast network of public and private health care establishments. With a clear vision of a healthier society, the Commission works to ensure that every individual regardless of background, has access to safe, reliable, and good quality medical care. It does so by setting clear benchmarks for service delivery and ensuring that these standards are consistently upheld across all health care systems, including Allopathic, Homoeopathic, and Tibb practices.

A key aspect of the Commission work lies in protecting patients. It actively combats quackery and unethical practices, taking decisive action against those who compromise public health. At the same time, it strives to build trust in the health system by safeguarding patient's rights and promoting evidence-based medical treatment. Through a structured and dynamic regulatory process, comprising registration, licensing, inspections, and continuous monitoring, the Commission keeps a vigilant eye on the performance and compliance of health care establishments. This ongoing oversight ensures adherence not only to legal and professional obligations, but also to ethical principles and internationally recognised standards.

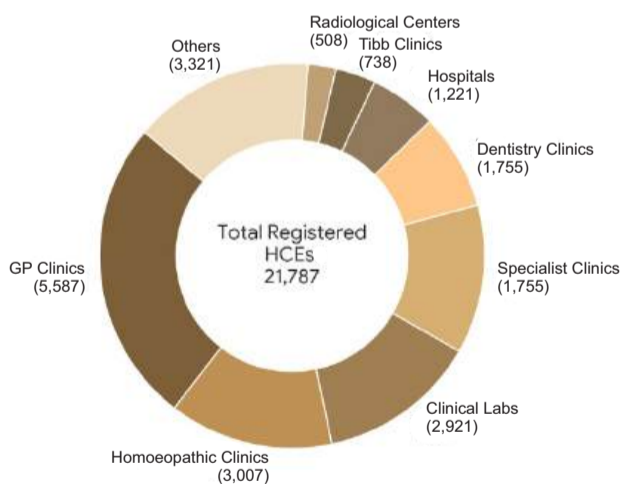

In essence, the Commission serves as a guardian of quality and integrity in health care, working tirelessly to elevate standards and strengthen public confidence in the system.

ENHANCING HEALTH CARE QUALITY THROUGH REGISTRATION AND LICENSING

The Khyber Pakhtunkhwa Health Care Commission (KP HCC) continues to play a central role in organising and regulating the health care landscape of the province. Through its statutory authority, the Commission ensures that all health care establishments (HCEs), whether in the public or private sector, are formally registered and brought within a well-defined regulatory framework. This process not only strengthens institutional oversight but also promotes accountability across the health system.

Over time, the registration drive of HCC has significantly expanded the scope of regulation. During the reporting quarter alone, 487 newly established HCEs were registered, reflecting a sustained effort to document and monitor health care providers across the province. The cumulative number of registered establishments has grown substantially to 21,787, demonstrating the long-term commitment of the Commission to broadening regulatory coverage and enhancing good governance within the sector.

Total Registered HCEs (Major Categories)

HCEs Registered in the Reporting Quarter (Jan - Mar 2026)

In addition to registration, the HCC has introduced a structured licensing mechanism designed to elevate the quality and safety of health care services. This system is not merely regulatory, but also facilitative in nature, combining technical guidance, capacity-building initiatives, and detailed evaluations of HCEs against established Service Delivery Standards (SDS). Through this approach, health care providers are supported in meeting the required benchmarks while progressively improving their service delivery.

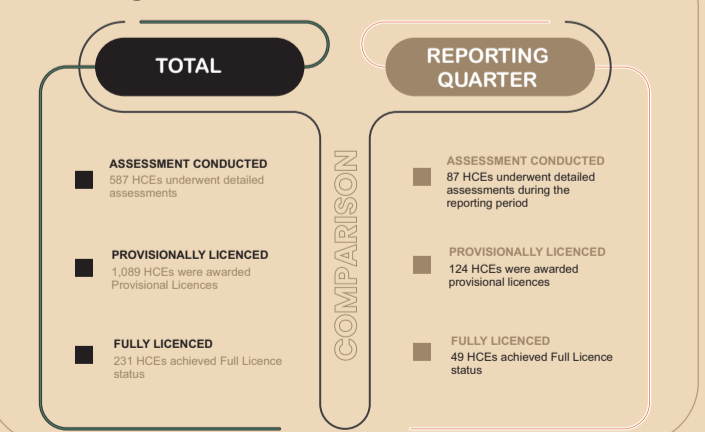

Conducting assessment of health care establishments for KP HCC licensing

As part of this ongoing effort, 87 HCEs underwent comprehensive assessments during the reporting period, 49 successfully met all prescribed criteria and were granted full licences, reflecting their adherence to quality and safety standards. At the same time, 124 received provisional licences, enabling them to continue operations while working towards full compliance. These establishments include general practitioner clinics, specialist clinics, dental practices, and diagnostic laboratories.

Since the introduction of the licensing framework, the Commission has carried out 587 assessments, resulting in 231 fully licensed HCEs across the province. Moreover, 1,089 HCEs were provisionally licensed. This phased and supportive regulatory approach encourages continuous improvement, strengthens compliance, and ensures that health care providers steadily align with established legal, professional, and quality standards.

Licensing Drive

ADVANCING REGULATORY ADHERENCE THROUGH CAPACITY BUILDING INITIATIVES

Safe, ethical, and high-quality health care remains a central priority of the Commission, and being the sole regulatory authority of the province, KP HCC ensures that HCEs operate in accordance with established legal and professional standards. Licensing, as mandated under the Khyber Pakhtunkhwa Health Care Commission Act, 2015, serves as a cornerstone of this regulatory framework, reinforcing accountability and quality assurance across the health sector.

Recognising that effective regulation extends beyond enforcement, the Commission adopts a supportive and facilitative approach to compliance, it actively assists health care providers by offering technical guidance, operational support, and practical tools to help them align with prescribed SDS. This collaborative strategy fosters a culture of continuous improvement and encourages HCEs to enhance both service quality and patient safety.

A key pillar of this approach is capacity building. HCC regularly organises structured trainings and orientation programmes, aimed at strengthening the knowledge, skills, and competencies of health care professionals and support staff. These initiatives are carefully designed to improve understanding of SDS requirements, and to enable their effective implementation at the facility level.

Through this balanced approach, combining regulation with guidance and education, the Commission continues to strengthen compliance, elevate standards, and promote a more responsive and accountable health care system across the province.

Training of HCEs staff on service delivery standards

Dr. Uzma Syed, Deputy Director Quality, addressing the audience

Participants include a diverse mix of clinical practitioners, administrators, and technical personnel from various types of HCEs across the province.

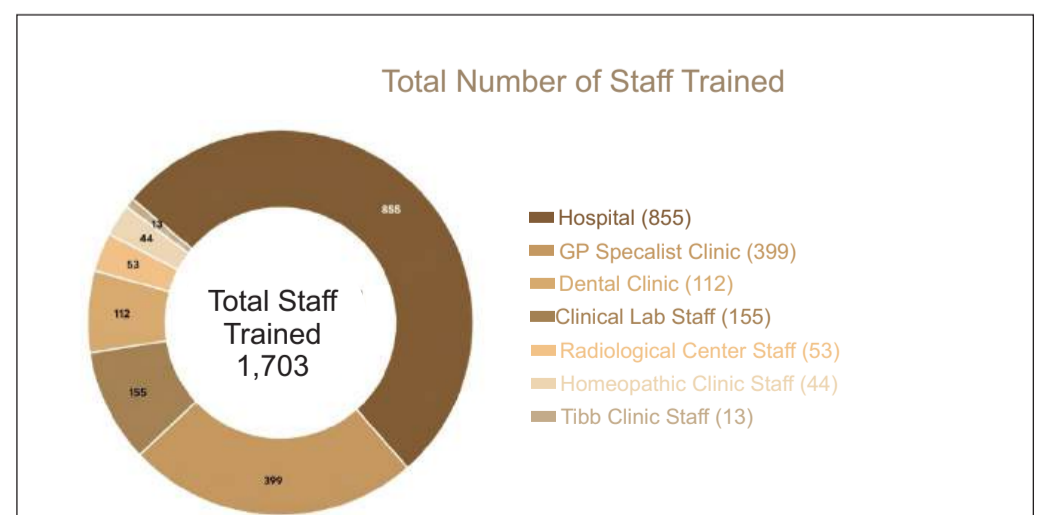

During the reporting period, eight training sessions were conducted, in which 199 health care professionals, including 26 newly hired inspectors/assessors were successfully trained. Since the introduction of licensing-focused training initiatives, 1,703 health care providers and staff have benefited from these programmes, reflecting the Commission's sustained commitment to professional development within the sector.

The training sessions are interactive and practice-oriented, allowing participants to directly apply their learnings in their workplace settings. This hands-on approach not only enhances individual capacity but also contributes to measurable improvements in service delivery and regulatory compliance. Each session concludes with an open question-and-answer segment, where participants are encouraged to seek clarifications and discuss practical challenges. Trainers, along with the representatives of the Commission, remain fully engaged until all queries are comprehensively addressed, ensuring that attendees leave with clarity, confidence, and a strong grasp of the subject matter.

STRENGTHENING REGULATORY FRAMEWORKS FOR CLINICAL TRIALS IN PAKISTAN

Mr. Mohsin Ali Turk, Director Legal Affairs represented the Commission at the annual symposium titled “Promoting Clinical Research in Pakistan” organised by Rehman Medical Institute through its Clinical Trials Unit. Mr. Mohsin delivered an insightful address highlighting role of KP HCC in strengthening regulatory frameworks and safeguarding patient rights within the healthcare system.

Mohsin Ali Turk, Director Legal, addressing the audience at the symposium

The symposium was convened with the objective of advancing and reinforcing the landscape of clinical research in Pakistan. It brought together a diverse group of participants, including health care professionals, academic researchers, representatives from the Drug Regulatory Authority of Pakistan, as well as key stakeholders from the pharmaceutical sector across the country. Throughout the event, comprehensive deliberations were held on critical aspects, such as the promotion of high-quality clinical trials, capacity building in research, streamlining regulatory mechanisms, and ensuring the protection of patient rights and safety. The speakers collectively underscored that adherence to transparent, ethical, and internationally aligned research standards is essential for enhancing global trust and credibility in clinical research domain of Pakistan.

A view of the symposium on promoting clinical trials in Pakistan

ADVANCING MULTISECTORAL ACTION AGAINST ANTIMICROBIAL RESISTANCE

The 4th meeting of the National Multisectoral Antimicrobial Resistance (AMR) Steering Committee was convened on January 19, 2026, in Islamabad, assembling key stakeholders from across the human health, animal health, agriculture, and policy sectors. The meeting served as a significant platform to review ongoing efforts, assess progress, and deliberate on future strategies to effectively combat antimicrobial resistance in Pakistan. Participants engaged in comprehensive discussions on strengthening intersectoral coordination, improving surveillance systems, promoting responsible use of antimicrobials, and enhancing public awareness regarding the growing threat of AMR.

Dr. Nadeem Akhtar, Chief Executive Officer of the Khyber Pakhtunkhwa Health Care Commission, attended the session as a member of the Steering Committee and contributed to the dialogue on reinforcing regulatory frameworks and ensuring compliance with quality health care standards in addressing antimicrobial resistance.

A key outcome of the meeting was the formal approval of the National Action Plan on Multisectoral Antimicrobial Resistance by the Steering Committee. The

updated action plan outlines a comprehensive and coordinated roadmap, aimed at strengthening national capacity to prevent and control AMR through a One Health approach, emphasising collaboration across sectors, improved governance, research advancement, and sustainable implementation of policies aligned with international best practices.

STANDARDIZING DRUG TREATMENT & REHABILITATION SERVICES

The Directorate of Quality at the Commission successfully organised a stakeholder consultative meeting on January 28, 2026, in Peshawar, marking the initiation of the development of Service Delivery Standards for Drug Treatment and Rehabilitation Centers across the province. This significant initiative represents a proactive step towards strengthening the regulatory structure, governing rehabilitation services in Khyber Pakhtunkhwa. The session was convened by Dr. Uzma Syed, In-charge /Deputy Director of the Directorate of Quality and for the legal guidance, Director Legal Affairs, Mr. Mohsin Ali Turk participated in the seminar. The meeting witnessed active participation from a broad spectrum of stakeholders, including psychiatrists, clinical psychologists, representatives from both public and private drug rehabilitation facilities, academia, mental health-focused non-governmental organisations, and development partners. Deliberations during the consultative session centered on the urgent need to establish

standardised, well-regulated, and quality-assured treatment and rehabilitation services for individuals affected by substance abuse disorders. Participants contributed valuable perspectives on key areas, such as clinical management, ethical considerations, patient-safety protocols, institutional governance, and long-term rehabilitation outcomes. Emphasis was placed on ensuring that all services are aligned with legal requirements, ethical standards, and human

rights-based principles.

This initiative underscores commitment of the Commission in ensuring the provision of safe, effective, and high-quality healthcare services. It further aims to eliminate unregulated practices while fostering the adoption of evidence-based and patient-centered approaches in drug abuse treatment and rehabilitation centers, ultimately addressing the needs of a historically underserved and vulnerable segment of society.

OPERATIONAL CHALLENGES AMID RISING FUEL COST AND AUSTERITY MEASURES

The Health Care Commission is actively engaged in anti-quackery initiatives, as well as ensuring quality across health sector in the province. However, in light of the recent increase in fuel prices, and austerity measures being implemented by the Government of Khyber Pakhtunkhwa, affected the efforts of the Commissions adversely. Due to limited availability of funds, it is becoming increasingly challenging for Khyber Pakhtunkhwa Health Commission to maintain the level of existing field operations.

Despite challenges, KP HCC remains committed to Its mission of ensuring quality health care services and eradicating quackery in all forms

LEGAL COMMUNITY SENSITISED ON HEALTH CARE REGULATION AND MEDICAL NEGLIGENCE ISSUES

The Directorate of Legal affairs of the Commission, organised an informative seminar on the regulation of health care services at the District Bar Association, Peshawar. The primary objective of the seminar was to raise awareness among key stakeholders, particularly members of the legal fraternity, regarding the roles and responsibilities of the Commission, as well as the existing legal and regulatory mechanism, governing the standardisation and licensing of HCEs. Anti-quackery measures and grievance redressal mechanism, with particular emphasis on handling cases related to medical negligence, were also highlighted during the session.

The seminar featured comprehensive addresses by Mr. Mohsin Ali Turk, Director Legal Affairs, and Dr. Shafa Haider Sawal, Director Registration, along with other officials of the Commission. Distinguished representatives from the legal community, including Mr. Qaiser Zaman, President of the Peshawar Bar Association, Mr. Zahid Ullah, General Secretary, and Mr. Iftikhar Hussain, Chairman of the Legal Education Committee, also spoke on the occasion and engaged with the participants.

During his address, the Director Legal Affairs elaborated the statutory mandate of the Commission, and highlighted the roles of relevant regulatory bodies, including the National Council for Homeopathy. He emphasised that the regulatory strategy of the Commission is not punitive in nature, rather to facilitate health care practitioners, safeguard patient rights, and promote safe, ethical, and standardised medical practices.

Seminar on the regulation of health care services for legal professionals at the district bar association

The President of the District Bar Association commended efforts of the Commission in fostering collaboration with the legal community on matters related to medical law. Meanwhile, the Chairman of the Legal Education Committee expressed his intention to incorporate relevant content into the Bar's vocational training curriculum, recognising the importance of legal awareness in health care regulation.

This seminar was part of the broader initiative of the Commission to enhance awareness and build capacity among stakeholders, thereby strengthening the overall regulatory environment for health care services in the province.

STRENGTHENING PUBLIC INTERACTION THROUGH E-KHULI KACHEHRI

On the instructions of the Chief Minister of Khyber Pakhtunkhwa, an E-Khuli Kachehri was thoughtfully organised by the Khyber Pakhtunkhwa Health Care Commission as part of its ongoing commitment to transparency, public engagement, and improved service delivery. This virtual forum served as an accessible platform, where citizens from various regions could directly connect with the Commission, voice their concerns, and seek clarity on matters related to health care regulations and services.

The session of the E-Khuli Kachehri was presided over by Dr. Nadeem Akhtar, the Chief Executive Officer of the Commission, conducting the proceedings with professionalism and attentiveness. He was accompanied by the senior management of the Commission. The session maintained a structured, yet inclusive environment, ensuring that each participant felt heard and valued.

The primary objective of the E-Khuli Kachehri was to create an open channel of communication between the public and the regulatory body. It aimed not only to address the questions and concerns of the masses, but also to actively encourage constructive suggestions that could contribute to enhancing the quality of health care services across the province. To maximise public participation, questions were collected through multiple channels,

including a dedicated QR code system as well as direct comments submitted during the session. This hybrid approach allowed for broader outreach and ensured that individuals with varying levels of digital access could take part.

All queries received were carefully reviewed and responded to, in accordance with the established rules and regulations of the Commission. The responses provided were informative, clear, and aligned with the Commission's policies, reflecting its commitment to accountability and public service. Overall, the E-Khuli Kachehri proved to be an effective initiative in strengthening public trust, fostering transparency, and promoting meaningful dialogue between the authorities and the community.

IMPROVING HEALTH CARE OVERSIGHT THROUGH COMPLAINT RESOLUTION MECHANISMS

There has been a significant rise in public awareness regarding the right to access safe and quality health care services, which has consequently led to an increased number of complaints pertaining to patient rights and service delivery. In response to this growing demand for accountability, the Commission has established a comprehensive and effective Complaints Management System. This system enables the receipt and resolution of complaints through both digital and manual channels, ensuring a standardised, transparent, and timely handling of grievances.

During the reporting quarter, the Commission received a total of 210 new complaints through various platforms, including the HCC Online Complaints Portal, the Pakistan Citizens Portal under the Prime Minister’s Performance Delivery Unit, the Chief Minister’s Ikhtiyar Awam Ka Portal, as well as through direct manual submissions. Out of 218 (210 new complaints and 8 remaining from the pervious quarter), 213 complaints were thoroughly examined and resolved, reflecting strong commitment to responsiveness, transparency, and public accountability. Since 2022, a total of 4,738 complaints have been received through multiple channels, of which 4,675 have been successfully resolved, and the remaining are under process.

Furthermore, Review Committee meetings were convened and hearing of 714 cases was conducted, resulting in the imposition of penalties on 653 HCEs found in violation of applicable regulatory standards. In addition, as part of its mandate to ensure patient safety and quality of care, the Commission identified 419 HCEs involved in serious non-compliance and consequently ordered their permanent sealing. This comprehensive approach by the Commission to enforcement and grievance redressal underscores its unwavering commitment to protecting patient rights, strengthening regulatory oversight, and promoting a culture of compliance and accountability within the health care delivery system of Khyber Pakhtunkhwa.

FINANCIAL AUDIT PROCESS OF MEDICAL TEACHING INSTITUTIONS

The contract for the financial audit of ten Medical Teaching Institutions (MTIs) was awarded to M/S Rifaqat Babar & Co, on directives of the Government of Khyber Pakhtunkhwa. Under the terms of the contract, the firm is responsible for conducting a comprehensive financial audit of last two fiscal years. The scope of work includes detailed examination of financial records, assessment of internal control mechanisms, and verification of compliance with applicable rules, regulations, and financial procedures. Upon completion of the audit, the firm will submit detailed financial audit reports, along with management letters highlighting observations, identified gaps, and actionable recommendations for improvement. The exercise is aimed at strengthening financial discipline, enhancing transparency, and ensuring accountability in the utilisation of public resources. Furthermore, the audit findings are expected to support informed decision-making and contribute towards improved governance and operational efficiency within the MTIs. The assignment will be completed by the end of April.

PROTECTING COMMUNITIES FROM UNQUALIFIED PRACTITIONERS

The persistent challenge of quackery remains a grave concern for public health, prompting the Health Care Commission to intensify and expand its province-wide counter-measures. Through a strategic blend of regulation, field enforcement, and public outreach, the Commission continues to demonstrate its firm resolve to ensure the delivery of safe, ethical, and scientifically grounded health care services. Central to this approach is the effort to reshape healthcare-seeking patterns by equipping the public with greater awareness of the serious risks linked to untrained and unauthorized practitioners. The Commission firmly believes that lasting success in eliminating quackery depends on strong community participation and consistent public support.

In parallel with its awareness initiatives, the Commission maintains a rigorous schedule of inspections and compliance checks to uphold regulatory standards. During the reporting quarter alone 6,576 HCEs were visited across the province. These inspections led to the issuance of 1,661 notices to non-compliant facilities, while 1,178 establishments were sealed due to critical violations, including operating without registration and failing to meet essential standards of care.

Field staff sealing a health care facility due to non-compliance with regulatory standards

STRENGTHENING GOOD GOVERNANCE THROUGH RIC DELIBERATIONS

As part of the Good Governance Roadmap of the Chief Secretary to the Government of Khyber Pakhtunkhwa, the Health Department regularly conducts weekly meetings and furthered the reform agenda, aiming at enhancing the efficiency and effectiveness of the government functions. The Commission regularly participated in the Roadmap Implementation Committee (RIC) meetings, participating in the collective effort of the Health Department to improve service provision to the public. The forum of the RIC proved beneficial to the Commission as well, and assisted in improving the regulatory framework of the Health Care Commission. In this regard, the approval process of the Licensing Rules was expedited, resulting in its final gazette notification by the Government. In addition, amendments to the Act of the Commission were vetted by the Law Department and are ready to be submitted to the cabinet for approval.

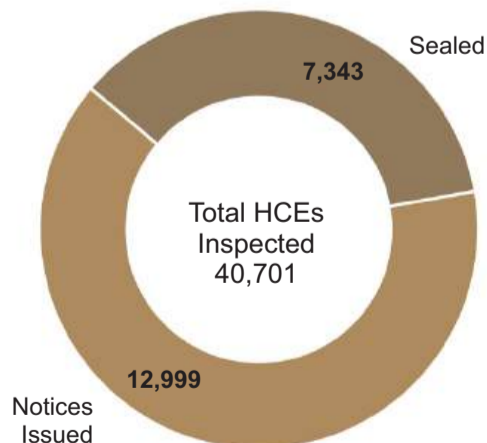

Dr. Shafa Haider Sawal, Director Registration, representing the Commission at the RIC meeting

Inspection Outcome – January to March 2026

Since 2022, a cumulative total of 40,701 HCEs have undergone inspection. Among these 7,343 were sealed for various breaches, and 12,999 HCEs were issued formal notices. These figures reflect the uncompromising and proactive approach of the Commission in curbing illegal and unsafe medical practices, reinforcing its commitment to safeguarding public health across Khyber Pakhtunkhwa.

Inspection Outcome – Since 2022

STRENGTHENING PUBLIC KNOWLEDGE ON HEALTH CARE REGULATIONS

The Directorate of Registration launched an extensive, province-wide awareness drive aimed at addressing the persistent issue of quackery. Through this initiative, field teams carried out a series of well-organised seminars across multiple districts, creating meaningful engagement with local communities, health care professionals, students, and members of civil society.

During the reporting quarter, 36 seminars were conducted in different districts of the province. A seminar was conducted at Government Centennial Model Higher Secondary School, District Upper Dir, where Inspectors of the Commission, Mr. Zain Ullah and Mr. Saad Ullah Khan guided the students and faculty members regarding health risks posed by quackery, and emphasised seeking treatment from qualified professionals.

Another seminar took place in Charsadda at Bradford School & College System, KP HCC Inspectors Dr. Syed Ijlal Haider and Dr. Mohammad Nasir briefed the faculty members and students of the institute regarding complaint management system, avoiding quacks, and functions of the Commission, including registration process, licensing criteria etc. These seminars were designed to shed light on the serious dangers associated with unqualified medical practitioners, while also informing participants about the ongoing efforts to eliminate illegal practices. Attendees were introduced to the regulatory and legal mechanisms in place to tackle quackery and were given a clear understanding of how unlicensed medical services can jeopardize patient safety and overall public health.

By combining community outreach with informative dialogue, the campaign not only raised awareness but also encouraged a more responsible and informed approach to seeking health care services across the province.

District level awareness seminars on the eradication of quackery to promote safe and quality health care services

STRENGTHENING EMPLOYEE BENEFITS THROUGH PENSION SCHEME

The Commission is committed to ensuring the welfare and financial security of its employees by introducing initiatives aimed at maximising their benefits. In this regard, a Voluntary Pension Scheme (VPS) has been established in collaboration with the National Bank through Nafa Funds. Under this initiative, separate VPS accounts have been created for 127 employees of the Commission, enabling them to secure their future through structured retirement savings. The scheme ensures that benefits are directly allocated to the employees, reflecting the commitment of the Commission to enhance employee well-being and fostering a supportive and sustainable work environment.

LEVERAGING MEDIA TO STRENGTHEN HEALTH CARE ACCOUNTABILITY

Media serves as a powerful channel for mass communication, capable of shaping public perceptions and influencing societal behaviour on a broad scale. Recognising this influence, the Commission has strategically leveraged a variety of media platforms to raise awareness about key issues, such as patient rights, complaint redressal systems, and actions taken against unqualified and illegal medical practitioners.

To ensure that its message reaches a wide audience, the Commission has actively collaborated with both electronic and print media. Television channels and widely read newspapers have played a significant role in amplifying its outreach. During the reporting period, KP HCC representatives appeared on Pakistan Television, where they were given dedicated airtime to discuss the Commission's initiatives and responsibilities. Mr. Mohsin Ali Turk, Director Legal Affairs, and Dr. Uzma Syed, Deputy Director/ In-charge, Directorate of Quality participated in the programme. Anti-quackery campaigns and enforcement actions against unregistered HCEs were discussed. The representatives of the Commission also emphasised the importance of verifying the registration status of HCEs before seeking medical services. Beyond electronic media, the Commission also made effective use of print platforms, such as daily Jang, Aaj, and Bayan to circulate press releases, promote anti-quackery seminars, and share updates on its regulatory activities. This multi-pronged media strategy has not only enhanced transparency but also strengthened public engagement and awareness.

Overall, these efforts reflect the commitment to proactive communication of the Commission, ensuring that the public remains informed, empowered, and confident in the role of the Commission as a regulator, dedicated to improving health care standards in Khyber Pakhtunkhwa.
